

KENTUCKY HEMP
ASSOCIATION

Urgent Attention Needed!

**Senate Appropriations Committee could
vote to ban most hemp products federally
as soon as tomorrow.**

It is imperative if you are a farmer, processor, retailer or consumer of hemp products you make your voice heard! Even though the government is currently shut down, they are still working in the appropriations committee to move forward with changes to the definition of hemp that would decimate the industry.

We need everyone to call Senator Mitch McConnell (202-224-3121) and also reach out to Speaker Mike Johnson: mikejohnson.house.gov to let them know these changes would be devastating. Senator Rand Paul is doing everything in his power to stop this, but he can't do it alone.

Please see the attached letter written by Justin Swanson on behalf of the Kentucky Hemp Association and reach out with any questions you may have (info@kyhempassociation.org). We appreciate your valued opinion and help in achieving our goals of moving this industry forward.
